

How to Change your Password in ActiveNet

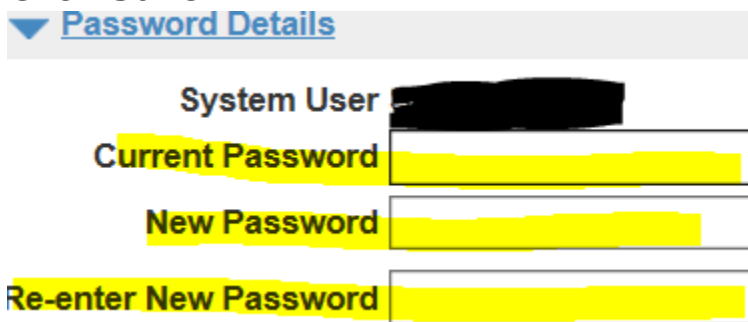

- Click on the blue **Account** link in the upper right corner of the screen
- Click on the **Edit/View Profile** Link

- In the **Operations** Window, Click on **Change Password**

- **Change Password**
 - [Edit Preferences](#)
 - [My Alerts](#)
- In the **Password Details** Window enter the password that you'd want to change in the Current password box
 - Enter & Re-enter your new password
 - Click Save

A screenshot of the 'Password Details' form. The form has a title bar with a dropdown arrow and the text 'Password Details'. Below the title bar, there are four input fields: 'System User' (with a blacked-out value), 'Current Password' (with a yellowed-out value), 'New Password' (with a yellowed-out value), and 'Re-enter New Password' (with a yellowed-out value).
